

GRM for species exp_species

Histogram of random variable b for species exp_species
colored by diagnosis

pop_structure_test formula= y~1 family= binomial

Coefficients: 6.73594340448919e-16

AUC 1

tau is: 0 t value is 8.00040001485039e-08

Histogram of permuated t values for species exp_species
actual t value for a tau of 0 in orange
number of permutations 10

pop_structure_test formula= y~1 family= binomial
Coefficients: 6.73594340448919e-16
AUC 1
tau is: 0 t value is 8.00040001485039e-08
pvalue for t is 0.7
